PERMISSION TO DISTRIBUTE TRANSCRIPT DATA
THROUGH TALKBANK
Carnegie Mellon University

Carnegie Mellon University is participating in a data-sharing program known as TalkBank that was established through federal and foundation grants to Brian MacWhinney at Carnegie Mellon. For the program to function properly, contributors will be asked to and will give permission for their work to be made available to other researchers. With a full understanding of the aforementioned, I hereby give permission to TalkBank to make and circulate electronic copies of the language transcripts and media that I describe below. These copies may be distributed to scholars and other responsible parties. I warrant that this use of the data is in accord with Human Subjects review procedures at my institution and that participants have given informed consent to have their data available to researchers. I also warrant that there is no copyright restriction over the transcripts and media being circulated. Any further restrictions that I wish to place on the use of these data are listed under (2) below. I do not hold Brian MacWhinney or Carnegie Mellon responsible for the enforcement of these further restrictions and indemnify and render harmless both Brian MacWhinney and Carnegie Mellon University against any actions at law or in equity or in similar courts of any jurisdictions arising from violations of these restrictions.

1. General description of the data set, and IRB Approval # (if available):

The child participants in this project are Julia and Sonya, who were monolingual anglophones at the time of the study. Julia was born and recorded in Montreal over 41 sessions between 1;05.17 and 3;06.18. Sonya was born and recorded in Montreal over 25 sessions between 1;09.13 and 2;10.27. The children were recorded in their homes in a naturalistic setting, generally in the absence of siblings, approximately every second week. During the recordings, the children typically looked at picture books and played with toys. The interviewer encouraged spontaneous word productions by the child and repeated the words produced by the child to facilitate identification of data for extraction and transcription.

IRB (if available):

2. Restrictions to be placed on the use of the data:

None.
