Subject: Data Being Shared

The following data are being sent for the internal use by the PIs of Kideval. They are not yet ready for distribution, both because they do not comply with IRB privacy regulations and full permission for distribution on CHILDES has not been obtained from the sender's co-authors. Depending on their utility, such permission can be pursued. They were for a time the property of a 3<sup>rd</sup> party, but they are now controlled by the co-authors of the DELV materials and were generated in large part with NIH funding.

1. General description of the data set, and IRB Approval # (if available):

These are preliminary versions of files that we are in the process of making compliant to IRB regulations—with your help.

They include:

zipped folder of CEX files of 78 language samples from 5 and 6yr-old AAE background children.

Zipped folder of same files in Excel (with some accompanying explanatory files). For example, there is also an information file in excel of demographics and multiple scores for the children which is to be pared down in consultation with the PIs.

Folders of 25 5yr old AAE-background children—with 3 videos (mpg) each and partial transcripts in txt). 1 CD's worth has been sent through We Transfer. The other 4 CDs are being sent by snail mail.

2. Restrictions to be placed on the use of the data:

**The files are for internal use of the following NIH supported project**

**Project Title: Improving the clinical utility of preschool language sample analysis**

**Application Number: 1 R01 DC017152-01**

**Nan Bernstein Ratner, PI**
