

**PERMISSION TO DISTRIBUTE TRANSCRIPT DATA  
THROUGH TALKBANK  
Carnegie Mellon University**

Carnegie Mellon University is participating in a data-sharing program known as TalkBank that was established through federal and foundation grants to Brian MacWhinney at Carnegie Mellon. For the program to function properly, contributors will be asked to and will give permission for their work to be made available to other researchers. With a full understanding of the aforementioned, I hereby give permission to TalkBank to make and circulate electronic copies of the language transcripts and media that I describe below. These copies may be distributed to scholars and other responsible parties. I warrant that this use of the data is in accord with Human Subjects review procedures at my institution and that participants have given informed consent to have their data available to researchers. I also warrant that there is no copyright restriction over the transcripts and media being circulated. Any further restrictions that I wish to place on the use of these data are listed under (2) below. I do not hold Brian MacWhinney or Carnegie Mellon responsible for the enforcement of these further restrictions and indemnify and render harmless both Brian MacWhinney and Carnegie Mellon University against any actions at law or in equity or in similar courts of any jurisdictions arising from violations of these restrictions.

**1. General description of the data set, and IRB Approval # (if available):**

Korean speech recordings and manual transcription files from 40 older adults with MCI and 37 cognitively normal older adults

For each participant, the dataset consists of responses to 16 questions in the following format:

- "Could you tell me what you liked most about your hometown, and any scenery or aspects you would like to be proud of or share?"
- "Could you talk about the job you did for the longest time, or what you have been doing recently?"
- "Are there any books or TV dramas you have enjoyed recently or in the past that you would recommend?"

**2. Restrictions to be placed on the use of the data:**

The data shall be shared solely for research purposes and shall be accessible only to researchers and institutions approved through DementiaBank's membership review process under restricted access permissions. The data must not be used for commercial purposes.

The data may be analyzed, and findings may be reported only in aggregated form. In general, the original audio recordings must not be played publicly for large audiences, including in presentations, conferences, or online postings.
