

**PERMISSION TO DISTRIBUTE TRANSCRIPT DATA
THROUGH TALKBANK
Carnegie Mellon University**

Carnegie Mellon University is participating in a data-sharing program known as TalkBank that was established through federal and foundation grants to Brian MacWhinney at Carnegie Mellon. For the program to function properly, contributors will be asked to and will give permission for their work to be made available to other researchers. With a full understanding of the aforementioned, I hereby give permission to TalkBank to make and circulate electronic copies of the language transcripts and media that I describe below. These copies may be distributed to scholars and other responsible parties. I warrant that this use of the data is in accord with Human Subjects review procedures at my institution and that participants have given informed consent to have their data available to researchers. I also warrant that there is no copyright restriction over the transcripts and media being circulated. Any further restrictions that I wish to place on the use of these data are listed under (2) below. I do not hold Brian MacWhinney or Carnegie Mellon responsible for the enforcement of these further restrictions and indemnify and render harmless both Brian MacWhinney and Carnegie Mellon University against any actions at law or in equity or in similar courts of any jurisdictions arising from violations of these restrictions.

1. General description of the data set, and IRB Approval # (if available):

This database analyzes the dysfluencies of Dutch speaking (Belgian-based) children and adolescents with down syndrome and aims to differentially diagnose stuttering and cluttering symptoms.

Obtaining this data set, which occurred in Belgium in 1998, was not subject to necessary approval of an Institutional Review Board or Ethics Committee. As such, participants did not explicitly give informed consent to participate in this study and have their data made available to researchers.

2. Restrictions to be placed on the use of the data:

Access to the data set should be password protected.

Video and audio recording should not be used outside the realm of TalkBank.
