PERMISSION TO DISTRIBUTE TRANSCRIPT DATA
THROUGH TALKBANK
Carnegie Mellon University

Carnegie Mellon University is participating in a data-sharing program known as TalkBank that was established through federal and foundation grants. For the program to function properly, many contributors will be asked to and will give permission for their work to be made available to other researchers. With a full understanding of the aforementioned, I hereby give permission to TalkBank to make and circulate electronic copies of the language transcripts and media that I describe below. These copies may be made available to scholars and other responsible parties in accord with the specific options that I select below. I warrant that this use of the data is in accord with Human Subjects review procedures at my institution. I also warrant that there is no copyright restriction over the transcripts and media being circulated. Any further restrictions that I wish to place on the use of these data are listed under (2) below. I indemnify and render harmless Brian MacWhinney, TalkBank, and Carnegie Mellon University against any actions arising from violations of these restrictions over which they had no control, such as Internet security breeches or failures of users to abide by the stated usage policies.

1. General description of the data set:

    LENA recordings collected by me and my collaborators at UC Merced.

2. Restrictions to be placed on data availability (check all that should apply):

___ Until ___ (year) users must contact me for permission to use these data

✔ (only some transcripts—see note) The transcripts may be placed into open access after removal of confidential material. Note: Some participants have NOT given permission for open access; others have. Which recordings' transcripts and media are shareable will be indicated in the metadata. Last names and embarrassing or private episodes should be removed before sharing. Date of birth should be removed from the metadata and CHA/ITS files (age in days and recording year can be retained).

✔ (only some media—see note) The media may be placed into open access after removal of confidential material. Note: Some participants have NOT given permission for open access; others have. Which recordings' transcripts and media are shareable will be indicated in the metadata. Last names and embarrassing or private episodes should be removed before sharing. Date of birth should be removed from the metadata and CHA/ITS files (age in days and recording year can be retained).

✔ (see note) The transcripts must be protected with a password. NOTE: For cases where participants have not given permission for public posting (and for portions containing un-removed last names, dates of birth, or embarrassing or private episodes). Users given the password must demonstrate ethics training and agree to respect the participants' privacy and not redistribute the data.

✔ (see note) The media must be protected with a password. NOTE: For cases where participants have not given permission for public posting (and for portions containing un-removed last

names, dates of birth, or embarrassing or private episodes). Users given the password must demonstrate ethics training and agree to respect the participants' privacy and not redistribute the data.

__ The media must be archived off the web

Additionally:

ITS and CHA files, with date of birth removed (age in days and recording year can be retained), can all be shared publicly regardless of participant permission.
