PERMISSION TO DISTRIBUTE TRANSCRIPT DATA
THROUGH TALKBANK
Carnegie Mellon University

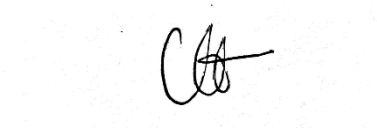

Carnegie Mellon University is participating in a data-sharing program known as TalkBank that was established through federal and foundation grants to Brian MacWhinney at Carnegie Mellon. For the program to function properly, contributors will be asked to and will give permission for their work to be made available to other researchers. With a full understanding of the aforementioned, I hereby give permission to TalkBank to make and circulate electronic copies of the language transcripts and media that I describe below. These copies may be distributed to scholars and other responsible parties. I warrant that this use of the data is in accord with Human Subjects review procedures at my institution and that participants have given informed consent to have their data available to researchers. I also warrant that there is no copyright restriction over the transcripts and media being circulated. Any further restrictions that I wish to place on the use of these data are listed under (2) below. I do not hold Brian MacWhinney or Carnegie Mellon responsible for the enforcement of these further restrictions and indemnify and render harmless both Brian MacWhinney and Carnegie Mellon University against any actions at law or in equity or in similar courts of any jurisdictions arising from violations of these restrictions.

1. General description of the data set, and IRB Approval # (if available):

   This data set contains recordings of 27 different children: eight French monolinguals, nine Greek monolinguals, eleven French-Greek bilingual children: six growing up in France and five in Greece. All children are aged between 2;9 and 6;2. They were recorded – for most of them – three times, once every six months (details in the corpus description). The procedure was a picture naming task in French and in Greek. Bilinguals did the tasks in both languages.
   The data set is made of audio files (.wav) and transcription files (.textgrid) worked through PHON. Demographic informations (such as city/country, age, gender) can be retrieved in the corpus description.
   IRB approval : 0001202-87

2. Restrictions to be placed on the use of the data:
   None
